Conference Background

To carry out the scientific outlook on development and the spirit of the 18th CPC National Congress, and integrate the concepts of ecological civilization of intensiveness, smartness, green and low-carbon with the urbanizing process, the **“2014 (the Ninth) Conference on Urban Development and Planning”**, supported by Ministry of Housing and Urban-Rural Development, P. R. China, organized by Chinese Society for Urban Studies and People's Government of Tianjin Binhai New Area, will be held on **September 23-24, 2014** in **Tianjin**, in the hope of providing a platform to improve and spread the advanced experience, innovative technologies and managerial approaches to tackle various challenges confronting urban development.

Conference Introduction

The annually held "Conference on Urban Development and Planning"(CUDP) was first hosted by the Ministry of Housing and Urban-Rural Development of China in 2006. With great supports from domestic and foreign governments and organizations, CUDP has seen dramatic growth in scale and impact each year and already ranked one of the most influential conference in relevant area in China, attracting more than 10000 participants in total, including officials, experts and scholars from governments and the related organizations and companies from dozens of countries, such as China, the UK, the US, Germany, Denmark, Sweden, Finland and Singapore etc.

The themes of the CUDPs through the years: "Extract Experience and Lessons from the Pioneer Countries Urbanization, and Promote the Construction of Energy-Efficient and Environmental-Friendly Society"(2006), "The Urban Culture Transformation, the Preservation of Famous Historic and Cultural Cities and The Cultivation of Innovative Culture in the Era of Globalization" (2007), "Ecological City-Our Common Home"(2008), "Harmony & Ecology: Sustainable Cities"(2009), "The Transformation of Urban Development Model in China—Ecological, Low-carbon and Digital City"(2010), "Low-carbon Transition and Green Development of Cities"(2011), "Livable, Low-carbon and Sustainable City Development" (2012), Treating Water Pollution , Ensuring Water Safety and Recovering Water Ecology(2013).
