## **Purpose and Significance**

A city is the hope for economic and social development, as well as the bed for all kinds of social problems and contradictions. Based on globalization and mechanization, the urbanization process has brought many development opportunities for every country. Meanwhile, it has deepened the problems of environmental pollution, resources shortage and social inequity. Under this background, “Green Transportation”, “Ecological City” and other new concepts on urban development have got the attention from all the state governments day by day. Each country has also given a greater study on green traffic and city ecological environment for finding ways out for Two-Wins of both protecting the ecological environment and city development, thus building up cities with suitable environment for human habitat. The issues of how to build up a green system of transit travel in the process of urbanization, how to protect the city ecological environment, as well as to construct habitable and ecological cities have already become the predominant topics gradually. Therefore, the Ministry of Housing and Urban-Rural Development, P.R. China, People’s Government of Hebei Province, together with other domestic and overseas government organizations, societies, and academic institutions in the same camp will hold “**the 2008 International Forum on Urban Development and Planning & the 1<sup>st</sup> Expo on Urban Planning and Construction in Hebei Province, China**”, in June, 2008, to scientifically use the experience of other counties for reference and work together to solve the problems that Chinese cities are faced with.

## **Participants**

The conference participants include delegates from the host organizations and international organizations; domestic and overseas well-known scholars and experts; heads and delegates from the governments of provinces, autonomous regions and municipalities; heads and delegates from departments concerning municipal city planning, transportation and ecological cities; experts, scholars and researchers in the fields of city planning, transportation, public health and environmental protection; specialists, faculties and students both from home and overseas colleges of city planning and design; famous real estate developers and city planning experts all over the world; experts and professionals from companies of planning and design, environmental design, gardening and landscaping design.
